## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 30 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on March 30, 2005. These drawings are accepted.
2. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the receiver in claim 23 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

Art Unit: 2637

number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The abstract of the disclosure is objected to because it is not limited to one paragraph. Correction is required. See MPEP § 608.01(b).

6. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "once every two clock units" (as recited in claim 5, lines 6 and 19; claim 15, line 4; claim 20, line 7) is not described in the detailed description.

### ***Claim Objections***

7. The claims are objected to because of the following informalities:

in claim 2, line 7, ", respectively" should be inserted after "sequence" for clarification;

in claims 10, 13, and 22, the Examiner suggests changing lines 2-3 as follows for clarification: " $(1 + (-1)^k j)$  or  $(-1 + (-1)^k j)$  wherein  $(k=0, 1, 2, \dots)$ , and  $j$  is the imaginary unit."

Appropriate correction is required.

### ***Allowable Subject Matter***

8. Claims 1-24 are allowable.

9. The following is a statement of reasons for the indication of allowable subject matter:

with regard to claims 1, 2, 4, 10-14 and 20-22, prior art of record does not teach or suggests in combination a spread spectrum communication apparatus which uses a

Art Unit: 2637

complex number sequence as recited in the last lines of claims 1, 11 and 20 in a complex spreading and/or despreading portion as recited in the respective independent claims;

with regard to claims 5-9 and 15-19, prior art of record does not teach or suggests in combination a spread spectrum communication transmitter comprised of the recited permuting processor; and

with regard to claims 23 and 24, prior art of record does not teach or suggests in combination a spread spectrum communication apparatus comprised of a multiplier and permuting processor as recited in claim 23, lines 4-8.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Popovic (US Patent No. 6,549,564 B1) teaches multiplying a complex preamble with a complex number sequence. However, the pattern differs from that recited in claims 1, 11 and 20.

11. This application is in condition for allowance except for the following formal matters: objections to the drawings, specification and claims.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
